Introduction

The PangTour that I proposed is a cultural and heritage guide on the Pangasinan website That helps Tourist and people of the Pangasinan to see and view their culture and popular tourist destination that are well known, Including the famous Hundred Islands in Alaminos city, the Patar white beach in Bolinao and also their enchanted cave and the Bolinao Lighthouse.

Framework

On the given option in the instructions There are 2 Options to choose, Option A is the react Framework and next.js 14 as Static Site Generator, and Option B is the Vue Framework and nuxt.js 3 for the Static Site Generator.

Comparison

Criteria	React + Next.js 14	Vue + Nuxt.js 3
Bundle size and performance	4/5	5/5
Developer velocity	4/5	5/5
Ecosystem maturity	5/5	4/5
Learning curve	3/5	5/5
Component architecture	5/5	5/5
Documentation and community support	5/5	4/5
Suitability for PangTour requirements	4/5	5/5
Total Score	30/35	33/35

Why did I choose Vue Framework with nuxt.js3

I used the Vue framework and nuxt.js3 as the Static Site generator for its simplicity and easy to understand and to work with it. Plus, the components can be reusable, such as buttons, grids, cards, search forms, and navigation items. The Nuxt.js 3 is suitable for small gadgets like smartphones and tablets
